

Elevation - Air Monitoring Station Locations

4.0 Abatement Phase Air Monitoring

Air monitoring of airborne asbestos fibers for NYCDEP Title 15 OSHA is included in this phase of the work. Worksite asbestos sampling locations include:

Porous Material Waste Decon Clean Room

Non-Porous Material Waste Decon Clean Room

Personnel Decon Clean Room

Shanty (location may change daily)

One HEPA Exhaust Location (location to change daily)

In any occupied area that is adjacent to an abatement barrier

Six (6) air samples will be collected and analyzed daily from OSHA locations for asbestos by TEM.
